

I. Tantárgyleírás

1. Alapadatok

1.1 Tantárgy neve

Civil Engineering Representation and Drawing

1.2 Azonosító (tantárgykód)

BMEEOEMAT42

1.3 Tantárgy jellege

Kontaktórák tanegység

1.4 Óraszámok

Típus	Óraszám / (nap)
Előadás (elmélet)	2
Gyakorlat	2

1.5 Tanulmányi teljesítményértékelés (minőségi értékelés) típusa

Félévközi érdemjegy

1.6 Kreditszám

4

1.7 Tárgyfelelős

név	Vajnáné Dr. Horn Valéria
beosztás	Egyetemi docens
email	horn.valeria@emk.bme.hu

1.8 Tantárgyat gondozó oktatási szervezeti egység

Építőanyagok és Magasépítés Tanszék

1.9 A tantárgy weblapja

<https://epito.bme.hu/BMEEOEMAT42>

<https://edu.epito.bme.hu/course/view.php?id=349>

1.10 Az oktatás nyelve

magyar és angol

1.11 Tantárgy típusa

Kötelező az építőmérnöki (BSc) szakon

1.12 Előkövetelmények

1.13 Tantárgyleírás érvényessége

2022. szeptember 1.

2. Célkitűzések és tanulási eredmények

2.1 Célkitűzések

Establishing and developing students' spatial reasoning ability, acquiring technical drawing what is the expression of communication in technical fields. In the course of the subject students learn four representation systems: perpendicular parallel projection, inclined parallel projection, centric projection and dimensioned representation.

During the semester students get acquainted with the following topics: imaging and reconstruction in Monge's two projection plane imaging systems, representation of space elements in a general and special position, catching, visibility, [transformation](#) of field elements, [intersection](#) tasks, [intersection](#) of solids with plane surfaces into rotation surfaces, levelling, interpenetration of solids with planes and rotation surfaces, shadow editing, line moving generated surfaces which can not be expanded.

Flat surface elements and simple rotating surfaces representation in perpendicular - parallel and oblique - parallel projection systems.

Representation of flat elements and simple rotating surfaces in a central projection system into two or one focus points onto vertical plane.

Basics of technical drawing are aimed at drawing elements, proportions and scales, reduction and enlargement, preparation of floor plan and cross section.

During the semester, students use the knowledge gained in the above listed topics and prepare their homework.

2.2 Tanulási eredmények

A tantárgy sikeres teljesítése utána a hallgató

A. Tudás

1. represents spatial elements in different projection systems; performs basic constructions, inserts a spatial element into plane
2. creates a new view of a flat-face solid and of a rotating surface, represent it visually; uses the [transformation](#) to determine the shape dimensions
3. draws the [intersection](#) of the general and specially positioned planes, of a straight line and a plane, and of straight and curve surfaces; constructs the real surfaces of planes of different and identical inclination roofs
4. plans the [intersection](#) with a general plane of a plane-shaped solid, of a plane of rotation, and rotates the sectioned surface into an image plane
5. constructs the [intersection](#) of plane-shaped solid and curved surfaces, spread the exposed surface into a plane
6. understands the shadow of the space elements in shadow editing, self-shadow, shadowy edges of solids, shadows to other elements and to the soil
7. edits the representation of perpendicular geometric elements in the dimensioned tasks, solves angular tasks, represent space elements parallel to a plane of projection
8. applies correctly drawing elements on different scales in a technical drawing; constructs floor plan
9. edits a simple section based on a floor plan
10. represents spatial elements in a graphical dimensioned representation system, interprets the inclination of the planes, creates landscaping tasks on smooth terrain, knows the filling and cutting of landscaping
11. acquires the legality of the projection system in orthogonal axonometry, represents space elements, planes and rotation surfaces, depicts a plane-shaped body a clinogonal axonometry
12. familiarizes with the legacy of the perspective, in a vertical plane picture-based system represents plane surfaces with two focus points, curved surfaces with one focus point
13. knows the distortion surfaces generated by straight lines (rotational hyperboloid, hyperbolic paraboloid) and the translational surfaces

14. has an overview of the realized examples in civil engineering practice of special surfaces, distorted surfaces, and the freehand drawing

B. Képesség

1. routinely applies basic constructions, determines the visibility on the basis of spatial reasoning
2. compiles the complex editing process by logical thinking
3. using the editing procedures in the homework assignment that described and practiced on the lectures and practice lessons
4. recognizes the wrong solutions and be able to present the right solutions
5. applies the terminology appropriately
6. considers the differences between solutions
7. uses the signalling system of the technical drawing, applies the different scales correctly, be able to reduce or enlarge and draws drawing tasks for thoughtful application of theoretical knowledge
8. constructs a floor plan of a smaller building with using correct drawing elements
9. understands building floor plans

C. Attitűd

1. cooperates with other course members and professors
2. expands geometric and technical drawing knowledge in the process of learning, provides the editing steps with the terms of the construction and justifies its correctness
3. strives for accurate constructions and flawless drawings

D. Önállóság és felelősség

1. carries out the specified design tasks/home assignments individually
2. open to well-founded critical remarks
3. in certain situations, e.g. in practical classes, helps the editing process on the basis of recognized rules
4. presents her/his opinion with justification

2.3 Oktatási módszertan

Lectures, seminars, consultation in oral and in writing

2.4 Részletes tárgyprogram

Week	Topics of lectures and/or exercise classes
1.	Rules of technical representation, space elements, basics of two projection representations, catching tasks

2.	Basic edits, transformation , solving measuring tasks with transformation
3.	Intersection tasks, intersection of special and general-position planes, editing of a piercing point, editing of roof form, rotation
4.	Intersection of flat-plane elements and rotating surfaces, determining the true size of the plane section , affinity
5.	Interpenetration of solids with planes and rotation surfaces
6.	Shadow editing, shadows of space elements on a plane projection, on a general plane
7.	Dimensioned representation, angular tasks, representation of a flat elements with specified conditions
8.	Basics of technical drawing, drawing elements, ratio and scale, reduction and enlargement, editing a floor plan
9.	Construction of section and facade
10.	Measured representation, surface construction of building fields
11.	Representing flat-plane solids and rotation surfaces in orthogonal and clinogonal axonometry
12.	Construction of vertical perspective on a plane-shaped body by two focus points, construction of rotating surface with one reference point
13.	The peculiarities of some distortion surfaces
14.	Special curved surfaces

A félév közbeni munkaszüneti napok miatt a program csak tájékoztató jellegű, a pontos időpontokat a tárgy honlapján elérhető "Részletes féléves ütemterv" tartalmazza.

2.5 Tanulástámogató anyagok

Online materials:

1. E-lecture notes: CAN BE DOWNLOADED FROM THE DEPARTMENT'S WEBSITE
2. Civil Engineering Representation-lecture-notes
3. [Descriptive Geometry Practice Book](#)
4. Manuals: DATASHEETS, BOOKS RECOMMENDED ON LECTURES
5. Paré, Loving, Hill and Paré's Descriptive Geometry

2.6 Egyéb tudnivalók

2.7 Konzultációs lehetőségek

The instructors are available for consultation during their office hours, as advertised on the department website.

Special appointments can be requested via e-mail: dudas.annamaria@emk.bme.hu

Jelen TAD az alábbi félévre érvényes:

II. Tárgykövetelmények

3. A tanulmányi teljesítmény ellenőrzése és értékelése

3.1 Általános szabályok

The assessment of the learning outcomes specified above in clause 2.2 considers a control test carried out, a mid-term test, the submitted practical sheets, 3 home assignments taking into account and the active participation on the seminars as well.

3.2 Teljesítményértékelési módszerek

Evaluation form	Abbreviation	Assessed learning outcomes
1 mid-term test (summarizing evaluation)	MT	A.1-A.10; B.1-B.2, B.7-B.8; C.3
1 control test (placement test)	CT	A.1-A.4; B.1
home assignment 1 (one-time evaluation)	HA1	A.1-A.4; B.1-B.4; C.1-C.3; D.1-D.2
home assignment 2 (one-time evaluation)	HA2	A.5-A.6; B.1-B.4; C.1-C.3; D.1-D.2
home assignment 3 (one-time evaluation)	HA3	A.8-A.12; B.1-B.4, B.7-B.9; C.1-C.3; D.1-D.2
Seminars - practical sheets (continuous evaluation)	PR	A.1-A.12; B.1-B.2, B.6-B.9; C.1-C.3; D.1-D.4
active participation (continuous evaluation)	A	A.1-A.14; B.1-B.9

The dates of tests, the handing-out and submission dates of home assignments are detailed in the course schedule on the subject's website.

A szorgalmi időszakban tartott értékelések pontos idejét, a házi feladatok ki- és beadási határidejét a "Részletes féléves ütemterv" tartalmazza, mely elérhető a tárgy honlapján.

3.3 Teljesítményértékelések részaránya a minősítésben

Abbreviation	Score
MT	40%
CT	10%
HA1	15%
HA2	15%
HA3	15%
PR	2,5%
A	2,5%
Sum	100%

3.4 Az aláírás megszerzésének feltétele, az aláírás érvényessége

Signature cannot be obtained.

3.5 Érdemjegy megállapítása

HA0, [HA1](#), [HA2](#), PR, A, are rated with a grade between 1 and 5.

The minimum requirement for obtaining a grade is a passed (2) for both parts of the mid-semester test (passed

for the descriptive geometry and for the engineering drawing part also), and at least a passed (2) for each home assignments. The final grade is calculated according to clause 3.3 in accordance with the general rules of rounding.

For those who fulfil the attendance requirements, the MT and CT grades are determined as follows:

Grade	Points (P)
excellent (5)	80 ≤ P
good (4)	70 ≤ P < 80%
satisfactory (3)	60 ≤ P < 70%
passed (2)	50 ≤ P < 60%
failed (1)	P < 50%

3.6 Javítás és pótlás

1. A second retake for the mid-semester test (MT) is provided on the delayed submission period with a charge.
2. Control test (CT) can be retake once during the study period.
3. The 1st and the 2nd home assignment ([HA1](#), [HA2](#)) can be submitted without a charge on the seminar the week after the normal deadline. The course cannot be accepted with a submission after the delayed deadline.
4. The 3rd home assignment ([HA3](#)) and the practical sheets (PR) can be submitted with a charge (amount noted in the policy) on the last day of the delayed submission period until 16:00.
5. The active participation – due to its speciality – cannot be resubmitted or exchanged in any ways.

3.7 A tantárgy elvégzéséhez szükséges tanulmányi munka

Activity	Hours/semester
participation in lectures and seminars	14×4=56
preparation for the seminars	14×0,5=7
preparation for the evaluation	5+20=25
preparation of the home assignments	32
Sum	120

3.8 A tárgykövetelmények érvényessége

2022. szeptember 1.

Jelen TAD az alábbi félévre érvényes:

2024/2025 semester I
