What Types of Stars have Planets?
We can look at the exoplanet archive to see what types of stars have been found to have at least one exoplanet. We can get a sense of the distribution of star types from a scatter plot.

```
star_types = ['G' 'K' 'F' 'D' 'M'];
star_colors = [0.66 0.73 1.00 0.80 0.85 1.00 0.57 0.57 1
              1 = exoplanets_cellfun(@(empty, exoplanets_st_spectral_t
data = []);
for i = 1:numel(star_types)
    data(i) = {star_types(i), st_spectral_type, star_types(i)
end
plot_star_types(data, star_types, star_colors)
```

Discover Live Editor

Create scripts with code, output, and formatted text in a single executable document.

Telepítési nehézségek esetén

- A telepítőt olyan könyvtárba töltsd le, ahol nincs benne ékezet vagy szóköz. Pl: C:\temp
- Proxy szerver kikapcsolása
- VPN kapcsolatok leállítása
- Matlab Online használata installálás helyett
- Régi MacOS esetén VirtualBox telepítése windows virtuális géppel.

In case of installation difficulties

- Download installer into a folder which does not contain any special characters or spaces. E.g. C:\temp
- Turn off proxy server
- Turn off all VPN connections
- Use Matlab Online instead of installation
- Old MacOS users should install VirtualBox with a windows VM.
